

RoboPupa HOOK: Dai Riki 135 #14 THREAD: 8/0 black, or match the head dubbing, ABDOMEN chartreuse or metallic green ultra wire, brassie size COLLAR ostrich, olive ANTENNA Krystal Flash, Lime Green HEAD: Hare's Ice Dubbing, Peacock or Caddis Green

TYING TIPS: Plush ostrich brings this fly to life. Beaded versions work well – just use the bead as the head and just enough dubbing to cover thread wraps.

1. Start thread near eye, tie in wire along the side of the hook, touching turns. Tie in wire down about 1/3 of the hook bend.
 2. Advance thread past the midpoint of the hook bend. Wrap wire with touching turns to the thread, and tie off.
 3. Tie in ostrich by the tip. Make 6-8 turns of ostrich for a plush collar. **TYING TIP:** SEE the video for a technique to make a plush, bulletproof ostrich collar.
 4. Build a smooth ramp of thread to the eye, and tie in Krystal Flash Antenna. Trim antenna to about 2x the length of the fly.
 5. Dub a ball of Hare's Ice for a head. Whip finish.
